GENERATING EMPLOYMENT - DESTROYING LIVES

According to the Santander Government and the United Nations Organization, an agreement has been signed where mining is allowed in sectors near Paramo de Santurban. It should be noted that environmentalists did not accept this treatment however, this decision was already made.

The Governor of Santander protects himself with the excuse of generating employment, and for this reason, he sees it as feasible to promote small to medium-sized mining in order to have an income and continue creating employment. This is the first step in order to move forward and be able to generate real income, said the governor. In these cases we, the people, doubt if this is for a common or individual good, and from this same other question arises. Environmentalists are known as those people who have extensive knowledge about our environment and with their knowledge, they can say with certainty that this activity is viable or not to do and in this case they did not accept this project. Yet, the government did not take their opinion into account. So why hire people whose functions are advising, if anyways it is going to be what "the boss" in this case the government considers convenient?

“We thank God because our students are safe and healthy”

KEEP ON WATCHING OUR FACEBOOK LIVE MASSES...

Last Friday 14th, we celebrated the 50 years of commitment and hard work that Sister Luzmila Sanchez Zapata has had serving the Lord. The whole school connected to a live-streamed mass that Colegio de la Santisima Trinidad offered to honor this celebration.
